

Assignment: Find the Hidden Image

Objective

You are given an image ([challenge.png](#)) that contains another image hidden within it. The hidden image contains a **four-digit number**. Your task is to recover the hidden image and identify this number.

Input

- [Challenge.png](#) (Download it from here [link](#))

Tasks

1. Load the image using Python
2. Analyze and explore the image (do not assume it is a standard image)
3. Extract the hidden image
4. Identify the **four-digit number** present in the hidden image

Submission Requirements

Please submit the following:

- Your code (Python script or notebook)
- The recovered hidden image
- The four-digit number
- A short explanation (2–5 lines) describing your approach

Allowed Tools

- Python
- NumPy
- OpenCV

Note

- The hidden content is embedded within the image data
- Focus on how image pixels are represented
- Partial recovery with correct reasoning is acceptable

Evaluation

- Correct recovery of the hidden image
- Correct identification of the number
- Clarity of approach
